mastery is expressed through the peerless craftsmanship of the company's artisans, also leveraging the Maison's watchmaking expertise to deliver four breathtaking "secret watches".

Representing the most expensive and precious timepiece that Bvlgari has ever produced, the Ruby Metamorphosis watch was designed as a set with the namesake necklace, embodying the jeweller's bold, unapologetic and sophisticated spirit. Crafted from platinum, this one-of-a-kind secret watch, which required 1,650 hours to complete, features a dial concealed by a cover dominated by a stunning antique cushion-cut 6.3 carat Mozambique ruby, whose intense red tone evokes the shades of a magnificent Italian sunset. The bracelet sensually wraps around the wrist through an intricate construction mingling baguette-cut rubies and diamonds set to convey ultimate suppleness.

Designed in combination with the matching necklace, the Celestial Sky watch celebrates Rome as an eternal source of inspiration for Bvlgari. The vibrant blue shade of the oval-shaped 6-carat Sri-Lanka sapphire standing out on this extraordinary platinum secret watch recalls the signature hues of the Roman sky. Curved lines and bold volumes evoking the sinuosity of Baroque motifs define the bracelets, where fancy-shaped sapphires, round-shaped diamonds and cabochon tourmalines are exquisitely paired in a graceful, harmonious balance that guarantees a comfortable fit.

Timeless, feminine elegance pervades the spirit of the Diamond Swan watch, created as a set with the namesake necklace. An emblem of

feminine beauty and softness, the swan was a recurrent presence in Art Deco art, conveying the same sense of timelessness elegantly telegraphed by this high-jewelry creation. Epitomising the outstanding ingenuity of Bvlgari's designers and artisans, this one-of-a-kind timepiece features a dial concealed by a 7-carat faceted rock crystal. The transparent cover cannot only be easily read through, but also creates enchanting light reflections contributing to the magic appeal of this watch. Its unique splendour is further enhanced by the bracelet graced with a cascade of diamonds in different cuts juxtaposed with mother-of-pearl inserts that appear to be floating in mid-air thanks to a special construction developed at Bvlgari's High Jewellery atelier in Rome.

Created to match the necklace bearing the same name, the Baroque Spiral watch celebrates the audacity, bravery and ultimate sensuality of the Baroque movement, which deeply influenced Rome's art and cultural heritage. The spiral geometry, symbolising life and evolution, is the main protagonist of this extraordinary timepiece on which curling baroque motifs triumphantly entwine with diamonds, emeralds, rubies and sapphires, radiating ultimate harmony and grace. The joyful, sophisticated flamboyancy of the timepiece is exalted by the rock crystal covering the dial and creating enchanting light reflections. Rock crystal is a transparent variety of the silica mineral quartz that is specially valued for its clarity. Every stone has its own identity and unique features. ◯

Bergeon

Nouveau tournevis de précision

Devenue manufacture à part entière après plus de dix ans de restructuration, Bergeon propose aujourd'hui un nouveau tournevis destiné aux travaux de rhabillage dans les secteurs horloger et optique. Cet outil est muni d'un adaptateur rapide en acier inoxydable, de deux joints de couleur permettant une meilleure identification du diamètre de la mèche et d'une douille de réduction en acier inoxydable (diamètre extérieur 3 mm/intérieur 0,5 à 2,5 mm). Sa tête à huit pans en matière synthétique avec cuvette offre une meilleure ergonomie. Au terme de sa réorientation, la maison chaux-de-fonnière consacre 60% de son personnel à la production des équipements et outillages commercialisés par l'entreprise. Le secteur usinage occupe aujourd'hui quelque 1'500 m² et abrite un parc machines de dernière génération comptant une vingtaine de CNC, dont plusieurs équipées de robots, permettant de réaliser une part importante de la gamme de produits labellisés «Bergeon Manufacture». ◯

New precision screwdriver

After more than ten years of restructuring, Bergeon has become a fully-fledged Manufacture and now offers a new screwdriver designed for refitting work in the watch and optical sectors. This tool is equipped with a stainless steel quick adaptor, two coloured

rings for enhanced identification of the bit diameter and a stainless steel reduction sleeve (external diameter 3mm/internal diameter 0.5 to 2.5mm). The eight-sided head made of synthetic material ensures enhanced ergonomics.

Following the firm's reorientation, more than 60% of staff based in La Chaux-de-Fonds-based is dedicated to producing equipment and tools marketed by the company. The machining sector now occupies some 1,500m² and houses a state-of-the-art machine fleet with some 20 CNC machines, several of which are equipped with robots, enabling it to produce a large proportion of its products labelled "Bergeon Manufactured". ◯
