TRADITION EQUIP AND ACCOMPANY

BERGEON, a manufacturer of professional tools and Equipment, has been working with watch brands and service centers for over 230 years. A leading company on the market, it offers the most comprehensive range of watchmaking tools in the sector: from screwdrivers to complete watchmakers' workbenches.

Constantly attentive to the needs of its customers, the company constantly offers innovations of products always more efficient and qualitative.

MASTERY

KNOW-HOW AND INDUSTRIAL PROCESS

BERGEON now masters its industrial processes and the technological know-how required to design and manufacture its tools within its factory. The integration of its various historical production sites has made it possible to concentrate high-performance equipment and the

more than a century of know-how under the same roof. Complete control of the production chain guarantees the constant quality of its products. The production capacity ensures the continuity of deliveries throughout the world.

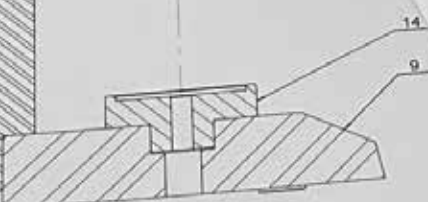

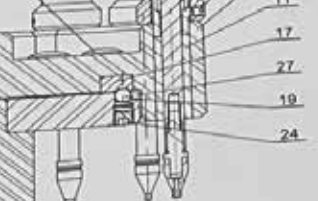

PRODUCTION MANUFACTURING OF LATEST GENERATION

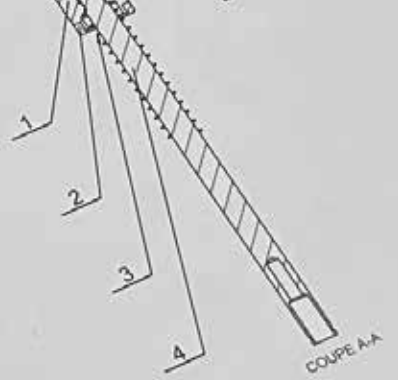

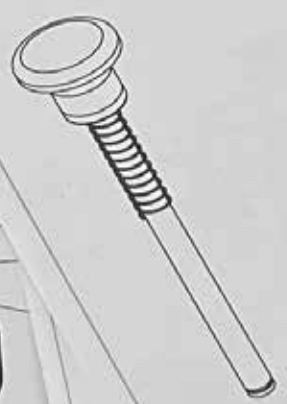

75% of BERGEON products are **manufactured in-house** and 25% are subcontracted in the region of **Arc Jurassien**.

- 14 CNCs
(6 lathes, 2 thread lathes, 6 CNCs (3-4 axes) with robot)
- Tribofinishing
- 2 fiber laser engraving units
(ferrous and non-ferrous metals)
- In-house prototyping
- Product development according to customer specifications
- Customizable products
- Technical support, maintenance and after-sales service

INNOVATION FROM IDEA TO DESIGN

The BERGEON R&D department has engineers, builders, drafters and designers who create and develop **new products** to meet the needs of its customers. **Curious and attentive** to the latest technologies, they design the products of tomorrow and **reindustrialize** others for **greater performance**.

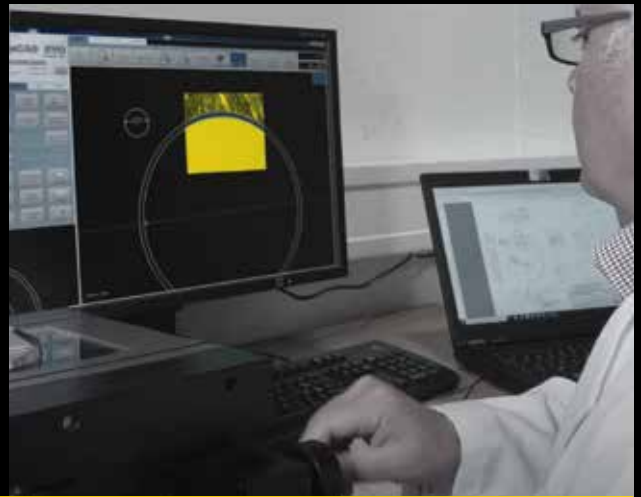

QUALITY CONTROL AND REQUIREMENT

BERGEON has always sought to produce its tools with a high level of quality by respecting precise procedures. Its objective is to achieve a single goal: excellence.

- **Control:** dimensional, aesthetic and functional throughout the manufacturing and purchasing process.
- **Continuous improvement:** systematic analysis of customer feedback, implementation and monitoring of corrective actions.
- **Management of safety documents and product compliance** according to Swiss and European directives (safety data sheets, declarations of conformity CE, REACH, FSC, etc.)
- **ISO 9001:2015 standard:** BERGEON obtained certification in 2021 with a constant desire to improve and the effective implementation of this principle is at all levels of the company.

Continuous improvement in the quality of products and services is BERGEON's brand image.

ASSEMBLY

FROM COMPONENT TO FINISHED PRODUCT

The BERGEON assembly workshop **masters the main know-how necessary for the assembly** of sub-assemblies, from the most basic to the most complex. The assembled elements coming mainly from its manufacture can be supplemented by industrial components.

Control is present during all the assembly phases in order to guarantee optimal quality. A dedicated team is authorized for this specific work in a modular space, for work in the best conditions.

PACKAGING PACKAGING AND PROTECTION

From the smallest part to the heaviest product, individually or in kit form, BERGEON has developed **solid experience in packaging**: sorting, counting, cleaning, putting into a blister or a bag, vacuum packing, labeling and addressing.

BERGEON organizes the packaging and assembly of more than 5,000 assorted products per year, of all shapes and sizes.

The packaging workshop meets **the highest requirements. Specific equipment** allows the automation of certain operations (bagging machine or wrapping machine for example). For operations that remain manual, they are carried out flawlessly by meticulous operators.

COMMIT AND ACT SUSTAINABILITY AND RESPECT FOR THE ENVIRONMENT

BERGEON customers around the world appreciate that the company cares about the **sustainability of its products** right from the manufacturing process. Designed with **quality materials**, the **robustness** of BERGEON products and the interchangeability of wear parts contribute to increasing the suggested longevity of the tools and equipment.

More than 10 years ago, BERGEON wanted to integrate and control the processes and methods of producing its products. It also strives every day to control the **management of resource consumption** in order **to limit its impact on the environment as much as possible**.

Aware of the influence that its activity can have on its environment, BERGEON has taken steps to obtain ISO 14001:2015 certification, which obtained in the fall of 2021.

Concrete actions in favor of the environment !

The new factory, the industrialization processes implemented and the high-quality requirements now allow BERGEON to see **new prospects**.

The company is now ready to develop **tailor-made products** at the request of its customers. It is now also aimed at the microtechnology sectors in the broad sense.

A leader in the professional watchmaking and jewellery market, BERGEON has always appealed to **lovers of technique, quality of execution and precision**.
