

BERGEON

BEZEL EXTRACTOR N° 7820

Bergeon is active on several fronts including the design, production monitoring and distribution of tools and equipment for the watchmaking, jewellery and microtechnical fields. This year, it is presenting a new bezel-extraction concept. This ergonomic new tool facilitates the extraction of all types of bezel ranging from 20 to 58 mm. The device also provides the possibility of integrating various tightening pliers and jaws suited to most bezel shapes. A support designed to enhance the stability of extraction operations.

DESCRIPTION_ Anodised aluminium handle. Universal pliers in a synthetic material with three sets of removable jaws. Specific pliers on request. Central support piece.

BERGEON

WATCH-STRAP PUNCHING DEVICE N° 30228

Industry professionals will appreciate this new device from Bergeon. This effective and practical tool optimises the perforation of all kinds of straps in leather, fabric and even rubber. Its aluminium structure and its ergonomic shape ensure perfect handiness for fast and efficient work.

DESCRIPTION_ Thickness: max. 4.5 mm. Width: max. 26 mm. Diameter of round roles: 1.00, 1.50, 2.00, 2.50 and 3.00 mm. Composed of punches, dies and centring pieces. Easy adjustment of the distance between the holes
